

Gekkoin Token's Emission Reglamente

v1.7 02/07/2020

Tokens

| Token | Ticker | Target Currency | Owner-account (address) | Smart_Contract |
|-------------------|--------|-----------------|--|--|
| Gekkoin EUR Token | EURG | EUR | 0x5c293938acbecc30f33fd814b53f694b10aa11d3 | 0x40C3f4c4189C04708E8C22659A16EbAfc22218E7 |

Participants/Operators

Emission of Gekkoin Tokens is being provided by Adventarium PTE. LTD

Adventarium PTE. LTD is Gekkoin Tokens' Operator

Issuer

The Issuer provides tokens' emission in random volume at owner-address of Token's smart-contract.

Tokens' Turnover

Tokens are being issued for sale-distribution purposes throughout crypto-exchanges, crypto-brokers and etc.

Tokens have to be transferred by the Issuer/Operator, crypto-exchanges or crypto-brokers to its buyers/holders accounts according to their instructions as a result of trade deals.

The Issuer/Operator accepts Tokens back according to its technical accounts (address) as a result of trade deals in exchange for fiat funds or crypto-assets.

Audit

All Tokens have to be transferred from its technical accounts (addresses) to owner-account (address) at the end of the Reporting Period (the end of each year quarter) and the number of outstanding Tokens issued to be calculated.

The amount of Tokens in Turnover is calculated as difference between total amount of Issued Tokens and amount of Tokens at owner-account (address) at the end of the Reporting Period.

The Issuer ensures the availability of sufficient uncollateralized assets to cover and support the ratio for Tokens in Turnover as 1:1 to the Target Currency.
